DEER AWAY® Deer and Rabbit Repellent

- Repels by Odor
- Protects trees and shrubs
- Ready to use spray

Active Ingredients:

Putrescent Whole Egg Solids 4.63%

Inert Ingredients 95.37%

Caution: Keep out of reach of children.

Application

Use restrictions: This product may be used to repel White-tail deer, Mule deer, Black-tail deer and Roosevelt elk that browse or uproot conifer seedlings. This product may also be used to repel White-tail deer from Yew, Scotch pine, Arborvitae, Douglas fir, Flowering Crabapple, Hemlock, Honeysuckle, Azalea, Rhododendron, fruit and citrus trees, and ornamental shrubs. Do not use this product on edible crops: See specific directions for application to fruit and citrus trees.

Application directions: Before applying, read and understand all labels and instructions. Spray repellent on all areas of plants likely to be browsed. Do not apply excessively to seedlings.

Timing of treatment: To protect against winter browsing, apply repellent upon onset of browsing. If browsing extends beyond two months, seedlings may be re-treated. To protect against spring browsing of new growth, apply upon onset of browsing, but preferably after bud break and before new shoots exceed 1 inch in length. Do not re-treat new growth. If spring browsing reaches unacceptable proportions before bud break, repellent may be applied to unopened buds, but must then be re-applied after new growth averages 4 in. in length if browsing still persists.

Weather conditions: Apply only to dry plants, and only under conditions favoring prompt drying of spray (lightly breezy, mild dry weather with low relative humidity).

Yew, Scotch pine, Arborvitae, Douglas fir, flowering, Crabapple, Hemlock, Honeysuckle, Azalea, and Rhododendron: Apply to terminal to point of run-off. For large trees, apply repellent only to lateral branches that are within animal's reach. Repeat as necessary.

Ornamental Shrubs: Repellent is not recommended for use during bud break or flower bloom, as foliage injury and petal drop may occur.

Fruit and Citrus Trees: For use on bearing and non-bearing trees. Use only when trees are dormant.

Note: Browning and drop of old needles may occur on some evergreen species after this product.

Environmental Hazards: Keep out of lakes, streams or ponds. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water by equipment cleaning or waste disposal.

Storage and Disposal: Do not contaminate water, food, or feed by storage or disposal. Store only in a cool, dry area inaccessible to children and pets. Protect from freezing and heat. Keep container tightly closed to prevent evaporation. If spillage occurs, dilute with water and flush away.

Pesticide Disposal: Waste resulting from use of this product may be disposed of on site or at an approved waste disposal facility.

Container Disposal: Sprayers should be triple rinsed (or equivalent) then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incinerator, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

Precautionary Statements: Hazard to humans and domestic animals

Caution: Avoid contact with eyes, skin or clothing. Wash thoroughly with soap and water after handling.

First Aid: If on skin, wash with plenty of soap and water. Get medical attention if irritation persists.
