

Model DF128CT, DF128RTU, DF16CT, DF16RTU, DF32CT, DF32RTU Deer-Off® Repellent

Environmentally-Friendly

Deer-Off® is biodegradable, environmentally-friendly and not harmful to humans or animals. Keeps deer and other garden guests from browsing on plants, flowers, hedges, buds, shrubs, grass, bulbs and small trees 'year round'.

Ready-To-Use and Concentrate

Deer-Off® is available in both a Ready-to-Use Spray (16 oz., 32 oz. and 128oz.) and in a cost-effective Concentrate (16 oz, 32 oz, 128 oz.) which produces eight bottles of Ready-to-Use at a 7:1 mix.

All Natural

Deer-Off® is the safe and all-natural effective deer repellent that is EPA and State DEP registered. It has over 350,000 users nationwide. It is made from organic ingredients. Deer-Off® does not contain any harmful chemicals. Deer-Off® helps keep Lyme Disease-carrying deer off your property.

Dual Deterrent System

Deer-Off® provides double the protection with the only patented dual deterrent system on the market that produces a powerful odor and taste barrier. Most other deer repellents rely on a single barrier.

Affordable and Cost Effective

Deer-Off® is affordable and cost effective. One thorough application lasts up to three months. One economical 32 oz. bottle of Deer-Off® concentrate yields eight quarts of ready-to-use spray (7:1 mix) that covers approximately 4000 sq. ft.

Deer-Off® Usage Tips

- Spray leaves, stems and branches until run-off or leaves look wet.
- Apply DEER-OFF® between 36°-90°F.
- Do not apply when vegetation is wet or if it is very windy.
- Store in a cool, dry area (40°-90°F). Protect from extreme heat and freezing temperatures.
- Spray DEER-OFF® on vegetable plants or fruit trees regularly, up to two weeks before harvest.
- Save your bulbs from underground burrowers! Dip bulbs in concentrate for approximately 5 to 10 minutes, allow to thoroughly air dry and then plant as usual.

Pest Control Tips

Protect plants, flowers, shrubs and other ornamental vegetation by spraying Deer-Off® regularly. Examine your yard for chewed leaves, petals and needles and other evidence of browsing. Re-spray immediately to retrain deer to look elsewhere for food.

Prevent deer from "yarding" on your property by spraying your grass area with Deer-Off®. If grass is brown first fertilize, seed and then spray with Deer-Off® to protect.

Protect sapling and trees from bark damage. Spray Deer-Off® to deter rabbits, squirrels and deer from stripping away this protective covering.

Tired of tree squirrels invading your backyard bird feeder? Spray Deer-Off® on the bird feeder and bird seed without interrupting the wild birds' feeding habits.

For wooden feeders spray Deer-Off® directly onto bird house.

For plastic or metal feeders soak cloth, twine or rope in Deer-Off® (concentrate works best) and tie around feeder.

Protect those fragile spring shoots and growth before they flower. Spray all new buds, shoots and other flowering vegetation before they bloom.
